DIARY NOTES

Executive Director - Comptroller *MMW*

23 August 1965

1. Bob Bannerman advised me that appropriate arrangements had been made with Mr. Kirkpatrick for termination of his special telephone service prior to his departure for Brown.

2. At the Morning Meeting Dick Helms requested that we get the full text of the Congressional Committee report on Aerospace which received some publicity in the morning paper this morning. I levied this requirement on John Warner. (He delivered them to me on 24 August. However, they are quite voluminous and I asked him to take them back and do a very brief summary.)

\*\*\*\*\*

3. Kirk telephoned to say that he thought the long-range planning group would finish their report prior to the 1 September deadline. In their discussions he has detected a move on the part of DD/P to take over the SSA function from DD/S. Kirk is in very strong disagreement with this but hesitates to comment on it in the long-range planning paper. He has had conversations with [redacted] [redacted]. I suggested that he might tell [redacted] and [redacted] that they should come and talk with me before proceeding any further in this direction.

4. I talked with Bob Bannerman and Ray Cline about Governor Kohler. The DCI now thinks, as a result of his visit to NPIC last Friday, that we should get Governor Kohler to come to Washington and enlist his services in the recruitment of photo interpreters. He has in mind dividing the U. S. in up to twelve regions coinciding with the military subdivisions of the U. S., and making an all-out effort to recruit photo interpreters. I told Ray and Bob that whether we agreed with this or not, the Director had suggested using Governor Kohler on at least three or four occasions and I thought it was time we did something about it. This problem isn't going to go away and I am waiting for recommendations as to how he can best be used.
